K-Class Flex II

BIZERBA

K-Class Flex II – the flexible version of the K-Class II family.
Based on the modular principle the components can be seamlessly integrated
into the store design. The perfect solution for a customized application.

Product description

The Bizerba K-Class II range achieves impressive results in all retail tasks: weighing, transactions, printing, advice, and the presentation of advertising and cross selling.
The K-Clas Flex II integrates perfectly in the concept and is ideal for use at the fresh food service counter. Individual components such as displays, printer, load receptor, CPU can be ergonomically placed to provide barrier-free access to the sales counter.
With a large customer display, it is perfectly equipped to support service staff providing proactive advice. It can also be combined with a cash drawer to create a highly effective checkout solution.
The remarkably easy paper-change function sets the new Easy Load printer apart.
The Bizerba printer 2" L compact as also the Epson printer TM-T70 use the clam shell technology. Paper change made easy:
Open printer - Insert paper roll - Close printer - Ready for operation!
Daily cleaning of the K-Class Flex II can be completed quickly and simply too, thanks not least to the Easy Clean surface of the housing.

K-Class Flex II - scale with KF printer

Highlights

– Highly flexible in terms of component arrangement
