GLM-levo

BIZERBA

GLM-levo – the standard in labeling.

"The Big 3": Performance, Plug-In®-Label and Quality-Check-Inside – this is the enormous benefit to meet your future requirements in labeling.

More information
High performance
with a wide range of
solutions and options.

Product description

The intelligent labeling line called GLM-levo, which has been designed for the automatic weighing and labeling of pre-packed goods, is available in several different versions. Its modular design allows it to be optimally configured in line with product and performance demands common to the food sector.

Thanks to the modular system and a performance of up to 200 packs/minute, it has been built to cope with today's and future requirements the food industry may make.

This labeling system is not only notable for its flexibility, but also for its robustness and easy-clean design. With intelligent visual quality control (optional) and automated activation of process data via the new function Plug-In®-Label operation is easier thereby reducing errors during the packaging process.

GLM-levo

Highlights

- Performance up to 200 packs/minute
- Control of up to 6 labelers
- Version with V-belt for round, spherical and unshapely products (up to 100 packs/min.)
- Ribbon-save function for thermal transfer ribbon
- Plug-In®-Label function: highest degree of automation, simply place label roll and start. The Plug-In®-Label (label roll with Data Matrix code on the reverse) enables automatic label verification and/or machine configuration
- Unicode inside
- Printing and processing of all common 1-dimensional and 2-dimensional barcodes, including Data Matrix and QR-code
- Remote Service

GLM-levo 100V

Plug-In®-Label function

Options

- BVS-L (visual check of packages and labels)
- Thermal transfer set-up
- Eco Motion printer
- Applications: Air jet, stamp, rotary, belt and C-Wrap applications
- Rejection systems
